NEW

Exclusive design rugged hard case with polyurethane padding.

<b>Model</b>	<b>Escort Trophy</b>
<b>Gauge</b>	12 GA (Gas Operated)
<b>Chamber</b>	3" - 76mm Magnum
<b>Stock &amp; Forend</b>	Turkish walnut
<b>Recoil Pad</b>	DuoTex Rubber
<b>Receiver</b>	Black anodised air craft alloy
<b>Barrel</b>	Black chrome finished Ni-Cr-Mo steel
<b>Barrel Length</b>	28" / 71cm
<b>Barrel Rib</b>	7 mm
<b>Chokes</b>	F, IM, M, IC, CYL, Extra Full
<b>Safety</b>	Manual cross button
<b>Magazine Capacity</b>	4+1
<b>Sights</b>	Fiber optic front sight
<b>Overall Length</b>	48" / 122 cm
<b>Average Weight</b>	7.4lbs / 3.3kg
<b>Length of Pull</b>	14.4" / 365mm
<b>Drop at Comb</b>	1.45" / 37mm
<b>Drop at Heel</b>	2.2" / 57mm

- Hunting purpose 12gauge, 3"/76mm magnum chamber, gas operated semi auto shotgun.
- Fast Loading System & Smart Valve Piston.
- Ergonomic & stylish design Turkish walnut stock and fore-end with checkering.
- Black anodized air craft alloy receiver with 11mm groove for scope mounts.
- DuoTex rubber butt pad for recoil absorption & 3 stock spacers to extend stock length of pull.
- Gold plated metal trigger.
- Capability of firing both 3"/76mm and 2 3/4"/70mm shells of 7/8 oz (24gr) shot load to heavy 2 oz (57gr) load magnum shells.
- Oxidation Proof - Chrome plated barrels made of Chromium, Nickel, Molybdenum steel. All barrels are Proof Tested.
- Available barrel lengths: 22"/55cm, 24"/61cm, 26"/66cm, 28"/71cm and 30"/76cm.
- Checkered & ventilated anti-glare rib with fiber optic front sight fitted.
- Steel shot suitable and extended multi 5 chokes F, IM, M, IC, and CYL. Plus an additional Extra Full choke.
- Total 6 extended chokes included.
- Magazine capacity: 4+1 rounds.
- Accessory magazine extension tube increasing capacity to 7+1.
- Accessory migratory plug decreasing capacity to 2+1.
- Comes with 6 stock shims to adjust stock drop and cast.
- Magazine cut-off system for single shot.
- Manual cross-button trigger safety.
- Sling swivels.
- Comes in its exclusive design rugged hard case with polyurethane padding.

Steel shot suitable and extended multi 5 chokes F, IM, M, IC, CYL.  
Plus an additional Extra Full choke.

## DuoTex

DuoTex butt stock offers two important confidence building features for the shooter. The DuoTex's smooth, non-stick upper surface provides for faster shouldering, while the rough textured lower surface stops the gun properly and securely into place.

6 stock shims to adjust stock drop and cast.

3 stock spacers to extend stock length of pull.

# ESCORT VISION

# ESCORT DYNAMAX TECHNOLOGIES

Serious. Solid. Impact.

## DynaComb

DynaComb is made of special elastic material. It provides superior reduction in felt recoil on cheek and increases shooting comfort.

Bolt is made of nickel-chromium-molybdenum steel and is hard chrome lined for longer life, less friction and maximum resistance against corrosion.

## DaSoft

DaSoft Finish Technology applied to the stock provides scuff resistance, improves durability, and protects against UV damage. DaSoft Finish Technology offers the user a soft, ergonomically comfortable shooting experience.

## DynaPad

DynaPad's V-shaped ventilation hole design provides superior recoil absorption and shooting comfort.

## HCS Hybrid Cycling System

Hatsan's patented Hybrid Cycling System combines the best features from each of the two traditional cycling operating systems. Recoil is low, while cycle rate and effective range are high. It will cycle light loads like a traditional gas system, but uses much less gas to do so – which means you don't have to clean as frequently. Disassembly/assembly is much simpler, as well, making maintenance even easier than ever. Hybrid Cycling System (HCS) brings together the perfect combination of speed, range, and comfort.

## Dynamax Hard Case

Exclusively designed for the Dynamax semi-auto shotgun. Compactly stores disassembled Dynamax shotgun, extra chokes, sights and other accessories. Sold Separately.

Nickel-chromium-molybdenum steel Barrel / Receiver module is hard black chrome lined on its outer surface and hard white chrome lined on its inner surface for maximum durability for any kind of shotshells including steel or tungsten shot and provides maximum resistance against corrosion.

Steel shot suitable multi 5 choke system (F, IM, M, IC, CYL).

Barrel / Receiver module

Stock / Trigger group module

**2PCS**  
Module

Its unique 2-piece modular design makes the Escort Dynamax shotgun one of the world's fastest and easiest shotgun to assemble and disassemble. It can be fully disassembled and reassembled in only seconds!

- Sling swivels.

# ESCORT SUPREMAX/XTREMEMAX TECHNOLOGIES

3 1/2" - 89mm Double Magnum

Serious. Solid. Impact.

## Stock Length of Pull Spacers

Three stock length of pull spacers that fit between stock and recoil pad are standard. The stock length of pull can be extended by increments of 5mm (1/5") by simply inserting one or more of these spacers. With these spacers any shooter can perfectly fit the stock length of pull which provides easier shouldering of the shotgun, faster swing on targets and less felt recoil.

The receivers are made of aluminum alloy (Ergal) material which is very light in weight but very resistant against high pressures. The black anodize plating on the receiver not only gives extra durability but also provides a life-time coating. Glossy or matt finish receivers are available.

The nickel-chromium-molybdenum steel barrels are standard for all Escorts. Hard white chrome plated bore and chamber provides maximum durability for any kind of shot shells including steel or tungsten shot; and provides maximum corrosion resistance, besides it is easier to clean.

Outside of the barrel is hard chrome plated again providing life-time maximum corrosion resistance. Barrels are available in matt or glossy finish.

The bolts of all Escorts are made of nickel-chromium-molybdenum steel and are hard chrome plated for longer life, less friction and maximum corrosion resistance.

3 1/2" - 89mm double magnum chamber which can handle all 12 gauge loads in a single shotgun.

## Escort Choke Tubes

All Escort shotguns (except for slug barrels) come with 5 mobile chokes: Full (F), Improved Modified (IM), Modified (M), Improved Cylinder (IC) and Cylinder (CYL). Extra full choke is available upon request. M, IC and CYL choke tubes are good for steel shots.

## Magazine Cut-Off

By pressing this button, you can retain shells in the magazine and can eject a shell from the chamber without feeding another one from the magazine.

## Stock Drop & Cast Adjustment Shims

3 stock drop shims and 1 stock cast shim. You can adjust the stock drop & stock cast perfectly fitting yourself and your shooting style by simply inserting one or more of the four special shims between the receiver and stock.

STOCK DROP SPACERS

STOCK CAST SPACERS

## Escort Fast Loading System

Escort Fast Loading System enables faster and easier loading into the magazine with one hand in the reliable double bar system. Escort's patented Fast Loading System provides faster loading of shot shells into the magazine without changing the aiming position. It also unlocks the bolt which is locked at the rear. Both the carrier and fast loading button are hard chrome plated for longer life and maximum corrosion resistance. Fast Loading System is standard on all Escort semi auto shotguns.

Flawless performance on all 12 gauge shot shells, from 24 g to 66 g. (7/8 to 2 3/8 oz)

## SmartMAX Piston

The new SmartMAX piston is specially designed for 3 1/2" (89mm) chamber Escort SupremeMAX and Escort XtremeMAX. The SmartMAX piston automatically adjusts the exact & reliable gas pressure needed for a wide range of loads from 7/8 oz (24gr) shot load to heavy 2 3/8 oz (66gr) load double magnum shells. When firing light loads almost all of the gases are used to operate the action and only a small portion is exhausted. When firing heaviest magnum & double magnum loads most of the gases are exhausted and only a portion of the gases are used to operate the action. Escort's patented SmartMAX piston automatically self adjusts this reliably even if you mix different size & weight shot shells in the magazine and allows the shooter to fire any 12 gauge load in seconds. Also, thanks to the SmartMAX Piston, most of the recoil is eliminated before it reaches your shoulder giving shooting conformance, reduced barrel rise and faster swing on targets.

When firing heaviest magnum & double magnum shells; excess gas pressure opens the front valve of the SmartMAX piston and excessive gas pressure is exhausted. SmartMAX piston automatically self adjusts the necessary gas pressure needed to operate the action and the excess gases exhaust upwards from the sides of the forend. As the majority of the excess gas pressure is absorbed due to SmartMAX Piston, most of the recoil is eliminated before reaching your shoulder and other inner parts of the shotgun are protected against high pressure impacts.

When firing light loads; almost all of the gas pressure is used to operate the action and only a small portion is exhausted. Because the gas pressure is relatively smaller in light loads, the gas pressure cannot open the front valve of the SmartMAX piston. Hence only a small portion is exhausted and the majority is used to operate the action.

- Glossy finish high class Turkish walnut stock and fore-end with checkering.
- Glossy finish receiver & barrel.
- Black anodized aircraft alloy receiver with 11mm groove for scope mounts.
- Rubber butt pad for recoil absorption & 3 stock spacers to extend stock length of pull.
- Gold plated metal trigger.
- Oxidation Proof - Chrome plated barrels made of

Chromium, Nickel, Molybdenum steel. All barrels are Proof Tested.

- Available barrel lengths: 24" / 61cm, 26" / 66cm, 28" / 71cm and 30" / 76cm.
- Checkered & ventilated anti-glare raised rib with fiber optic front sight fitted.
- Steel shot suitable multi 5 choke system (F, IM, M, IC, CYL).
- Magazine capacity: 4+1 rounds.
- Accessory magazine extension tube increases capacity to 7+1.
- Accessory migratory plug decreases capacity to 2+1.
- Comes with 4 stock shims to adjust stock drop and cast.
- Magazine cut-off system for single shot.
- Manual cross-button trigger safety.
- Sling swivels.

Flawless performance on all 12 gauge shot shells, from 24 g to 66 g. (7/8 to 2 3/8 oz)

## ESCORT SUPREMEMAX-SLG

3 1/2" - 89mm Double Magnum

Model	Escort SupremeMAX-SLG
Gauge	12 GA (Gas Operated)
Chamber	3 1/2" - 89mm Double Magnum
Stock & Fore-end	High grade Turkish walnut
Recoil Pad	Rubber
Receiver	Black anodized aircraft alloy
Barrel	Black chrome finished Ni-Cr-Mo steel
Barrel Length	24" / 61cm
Barrel Rib	-
Chokes	Fixed Cylinder
Safety	Manual cross button
Magazine Capacity	4+1
Sight	Fiber optic rear & front sight
Overall Length	44" / 111cm
Average Weight	7.2lbs / 3.3kg
Length of Pull	14 3/8" / 365mm
Drop at Comb	1 5/8" / 41mm
Drop at Heel	2 1/2" / 63,5mm

- 24" / 61cm slug barrel with adjustable fiber optic rear sight & adjustable fiber optic front sight.
- Flawless performance on all 12 gauge shot shells. Flawless performance on all 2 3/4" - 70mm, 3" - 76mm & 3 1/2" - 89mm.
- shot shells from 24gr (7/8 oz) light loads to 66gr (2 3/8 oz) heavy load double magnum shells.
- Hunting purpose 12 gauge, 3 1/2" - 89mm double magnum chamber, gas operated semi auto shotgun.
- Fast Loading System & SmartMAX Piston.
- Glossy finish high class Turkish walnut stock and fore-end with checkering.
- Glossy finish receiver & barrel.
- Black anodized aircraft alloy receiver with 11mm groove for scope mounts.
- Rubber butt pad for recoil absorption & 3 stock spacers to extend stock length of pull.
- Gold plated metal trigger.
- Oxidation Proof - Chrome plated barrels made of Chromium, Nickel, Molybdenum steel. All barrels are Proof Tested.
- Magazine capacity: 4+1 rounds.
- Accessory magazine extension tube increases capacity to 7+1.
- Accessory migratory plug decreases capacity to 2+1.

- Comes with 4 stock shims to adjust stock drop and cast
- Magazine cut-off system for single shot.
- Manual cross-button trigger safety.
- Sling swivels.

# ESCORT SEMI AUTO TECHNOLOGIES

3" / 76mm Magnum

Serious. Solid. Impact.

## Stock Length of Pull Spacers

Escort Supreme, Escort Xtreme and other wood stock Escort shotguns come with three stock length of pull spacers that fit between stock and recoil pad. The stock length of pull can be

extended by increments of 5mm (1/5") by simply inserting one or more of these spacers. With these spacers any shooter can perfectly fit the stock length of pull which provides him an easier shouldering of the shotgun, faster swing on targets and less felt recoil. On all other synthetic stock Escorts; Small, Medium and Large size recoil pads are available as an option. Medium size recoil pad comes on the shotgun as standard which provides 36cm (14 1/5") stock length of pull. This can be shortened by 5mm (1/5") and extended by 5mm (1/5") when Small & Large size recoil pad is fitted respectively.

The receivers of all Escorts are made of aluminum alloy (Ergal) material which is very light in weight but very resistant against high pressures. The black anodize plating on the receiver not only gives extra durability but also provides a life-time coating. Glossy or matt finish receivers are available.

The bolts of all Escorts are made of nickel-chromium-molybdenum steel and are hard chrome plated for longer life, less friction and maximum corrosion resistance.

The nickel-chromium-molybdenum steel barrels are standard for all Escorts. Hard white chrome plated bore and chamber provides maximum durability for any kind of shot shells including steel or tungsten shots; and provides maximum corrosion resistance, besides it is easier to clean. Outside of the barrel is hard chrome plated again providing life-time maximum corrosion resistance. Barrels are available in matt or glossy finish.

## Stock Drop & Cast Adjustment Shims

3 stock drop shims and 1 stock cast shim. You can adjust the stock drop & stock cast perfectly fitting yourself and your shooting style by simply inserting one or more of the four special shims between the receiver and stock.

**STOCK DROP SPACERS | STOCK CAST SPACERS**

## Magazine Cut-Off

By pressing this button, you can retain shells in the magazine and can eject a shell from the chamber without feeding another one from the magazine.

## Escort Choke Tubes

All Escort shotguns (except for slug barrels) come with 5 mobile chokes: Full (F), Improved Modified (IM), Modified (M), Improved Cylinder (IC) and Cylinder (CYL). Extra full choke is available upon request. M, IC and CYL choke tubes are good for steel shots.

## Escort Fast Loading System

Escort Fast Loading System enables faster and easier loading into the magazine with one hand in the reliable double bar system. Escort's patented Fast Loading System provides faster loading of shot shells into the magazine without changing the aiming position. It also unlocks bolt which is locked at the rear. Both the carrier and fast loading button are hard chrome plated for longer life and maximum corrosion resistance. Fast Loading System is standard on all Escort semi auto shotguns.

The Smart Valve Piston automatically adjusts the exact & reliable gas pressure needed for a wide range of loads from 7/8 oz (24gr) shot loads to heavy 2 oz (57gr) magnum loads. When firing light loads almost all of the gases are used to operate the action and only a small portion is exhausted. When firing heaviest magnum & double magnum loads most of the gases are exhausted and only a portion of the gases are used to operate the action. Escort's patented Smart Valve Piston automatically self adjusts this reliably even if you mix different size & weight shot shells in the magazine and Escort shoots them all. Also, thanks to the Smart Valve Piston, most of the recoil is eliminated before it reaches your shoulder giving shooting conformance, reduced barrel lift and faster swing on targets. Smart Valve Piston is standard on all Escort semi auto shotguns.

When firing heaviest magnum & double magnum shells; excess gas pressure opens the Smart Valve Piston and compresses the leaf spring. Smart Valve Piston automatically self adjusts the necessary gas pressure needed to operate the action and the excess gases exhaust upwards from the sides of the forend. As the majority of the excess gas pressure is absorbed thanks to Smart Valve Piston, most of the recoil is eliminated before reaching your shoulder and other inner parts of the shotgun are protected against high pressure impacts.

When firing light loads; almost all of the gas pressure is used to operate the action and only a small portion is exhausted. Because the gas pressure is relatively smaller in light loads, the gas pressure cannot open much the Smart Valve Piston and cannot compress the leaf spring. Hence only a small portion is exhausted and majority is used to operate the action.

## ACCESSORIES & OPTIONS

Serious. Solid. Impact.

### ESCORT Inner Chokes

Escort Inner Choke Tubes for 12-gauge and 20-gauge are available in Full (F), Improved Modified (IM), Modified (M), Improved Cylinder (IC) and Cylinder (CYL).

### ESCORT Extended Inner Chokes

Escort Extended Inner choke tubes for 12 gauge are available Full (F), Improved Modified (IM), Modified (M), Improved Cylinder (IC) and Cylinder (CYL).

### Extra Full Choke

Extended Extra Full Choke is available in 12 and 20 gauge.

### Magazine Extension Tube

Increases the magazine capacity to 7+1 rounds from 4+1.

### Migratory Magazine Plug

Decreases the magazine capacity to 2+1 rounds from 4+1.

### ESCORT Recoil Pads

Small, Medium and Large size recoil pads are available for synthetic stocks.

### ESCORT Shotgun Bag

Designed for Escort hunting shotguns and made of waterproof high quality material. It includes an additional compartment for a spare barrel and another compartment for ammo.

## TRIOPAD® Butt System

TRIOPAD® Butt System with TRIOPAD® Stock Spacers can be put on most Escort shotguns as an option. Recoil absorption is maximized with TRIOPAD® butt system which contributes to better shooting and faster swing on targets. With 3 TRIOPAD® Stock Spacers stock length of pull can be extended to different lengths.

## Stock Length of Pull Spacers

Stock length of pull spacers are available for wood stocks. The stock length of pull can be extended by increments of 5mm (1/5") by simply inserting one or more of these spacers.

## Stock Drop & Cast Adjustment Shims

3 stock cast shims and 1 stock drop shim are available. Any shooter can adjust the stock drop & stock cast perfectly fitting himself and his shooting style by simply inserting one or more of the four special shims between the receiver and stock.

*Cantilever to mount scopes are available on slug barrels as an option.*

## Barrel Extension

*Increases the barrel length by 10cm.*

## ESCORT Shotgun Case

Escort shotgun case is made of durable infrangible material. It allows you to carry every accessory that you need with your shotgun.

## BATSAS 121H

Serious. Solid. Impact.

### Batsas 121H-White

Model	Batsas 121H
Gauge	12
Chamber	3" / 76 mm Magnum
Unloading Mechanism	Auto Ejector
Stock	High Grade Turkish Walnut
Recoil Pad	Rubber
Receiver	Steel, White or Black chrome finish
Barrel Finish	Black Chrome
Barrel Length	28" / 71cm
Sight	Metal Bead Front Sight
Rib	Ventilated 8mm
Trigger	Single selective
Chokes	MC5
Overall Length	45" / 115cm
Average Weight	3,05kg - 3,35kg
Length of Pull	14,45" / 367mm
Drop at Comb	1,50" / 38mm
Drop at Heel	2,30" / 58mm

- 12 gauge, 3" / 76mm chamber over & under shotgun.
- Single selective gold plated trigger.
- Exclusive design single action trigger system.
- Auto ejector system.
- High grade Turkish walnut stock and fore-end with matt finish (kiln dried and moisture stabilized).
- Rubber recoil pad.
- Steel receiver in white or black chrome finish.
- Every single part of Batsas o/u shotguns are gone thru suitable heat treatment and hardening process which makes each part high resistant and durable.
- Barrels are Mono-block design. Oxidation Proof - Chrome plated barrels made of Chromium, Nickel, Molybdenum steel. Proof tested at 1400 bar.
- Silver welded barrels and silver welded barrel ribs.
- Strong and durable barrel locking system.
- Smart safety system. Automatic safety turns to ON position when the lever is opened and automatically turns to OFF position when the barrel is closed. This system prevents accidental pull of the trigger before barrel is completely closed and locked in its place.
- Available Barrel lengths: 24" / 61cm, 26" / 66cm or 28" / 71cm with 8mm ventilated & checkered rib.
- Steel shot suitable and extended multi 5 chokes: F, IM, M, IC, CYL.
- Comes in its exclusive hard case.
