

2022
THE PROS' EQUIPMENT

Tasmanian Tiger. We Equip The Professionals.

Even during the global Corona crisis with its dislocations in various areas, Tasmanian Tiger remains the reliable outfitter for professional military and police forces. With well thought-out premium products, we enable every user to put together the perfect set of personal mission equipment.

- For more than two decades, we have been consistently developing our product range every year, always with the aim of meaningfully supplementing and optimizing the entire collection.

In addition to the two backpacks **TT Mil Ops Pack 80+24** and **TT Mil Ops Pack 30** for special, military operations, there is also the **TT Base Pack**, a freely composable basic deployment backpack for individual applications.

In 2022, with the **TT Base Carrier**, we present for the first time a modular „soft“ cargo cramp with our most powerful X1 backpack carrying system. It can be adapted to different applications with various modules and expanded to a full-fledged backpack with the large **TT Base Carrier Pack**.

Two new, lightweight daypacks offer functional solutions for operational, under cover or even civilian use.

The **TT Sentinel** with zippered roll-top opening is designed to be loaded with light, possibly bulky equipment. It is available with 28 or 40 liters capacity.

The unobtrusive **TT Companion 30** is suitable for both civilian use and under cover operations with its lockable main compartment. It holds 30 liters of volume.

In various other segments of our program, we have developed new, modular additions to existing products, such as in the photo line the **TT Multipurpose Equipment Insert** for universal accommodation of camera equipment in existing TT backpacks.

Also for the year 2022 you will find your suitable equipment with us!

MILITARY OPERATIONS PACKS

Many special operations forces around the world and also the German Bundeswehr rely on Tasmanian Tiger equipment.

When called up for missions in unknown terrain, you have to be able to rely one hundred percent on your equipment. Tasmanian Tiger has developed two special, highly functional backpacks for this purpose: The **TT Mil Ops Pack 80+24** with high-performance V2 Carrying System and 104 liters for troop deployments and multi-day operations, and the **TT Mil Ops Pack 30** with a volume of 30 liters for operations in the field.

Optimal equipment is the basis of success!

BACKPACKS

TASMANIAN TIGER - COMPETENCE IN CARRYING

Tasmanian Tiger has a long-standing experience in backpack construction and proven expertise in high-performance backpack carrying systems.

When developing our backpacks, we place great value on ergonomic design, durable materials, functionality, and a perfect fit. For long journeys with a heavy load, the most important thing is the comfort of the backpack. That is why, in addition to the selection of the right pack sack, the selection of the right carrying system plays a central role.

The heart of a Tasmanian Tiger carrying system revolves around an internal frame structure that transfers the weight of the pack sack to the hip muscles via the hip belt. This transfer assures that pressure is relieved from the shoulders and spine. It is a basic fundamental that the heavier the load the more stable the support system must be.

However, the load transmission should not be completely stiff, but must remain flexible enough to ensure that even in rough terrain, the carrier can be agile in his/her movements, especially when traversing large obstacles. For the load transfer to work optimally, the carrying system must also function for various sized individuals. To ensure this, the Tasmanian Tiger carrying systems are adjustable in size and can be custom fit to a wide range of back lengths.

Because a backpack not only has to fit the application, its respective requirements, and the carrier, we have developed different carrying systems for different backpack models, shown on the following pages.

Tasmanian Tiger – Carrying Systems for every mission.

X1-SYSTEM

The size-adjustable high-end X1 Carrying System was specially developed for high loads over 40 kg. Particular attention was paid to the adjustability, ergonomics and ventilation of the system. Durable materials, multi-layered structures and reinforcements in the right places make the system stable and durable.

V2-SYSTEM

The size-adjustable V2 Carrying System was developed for medium to high loads up to 40 kg. A combination of aluminum and fiberglass bars results in an excellent balance of efficiency and flexibility in load transmission with low own weight. Channels on the back padding ensure good air circulation.

Comfortable shoulder straps can be adjusted in height 

Fiberglass bars optimize load transfer to the hip belt 

Lumbar pad with rubberized insert prevents slipping of the backpack 

 Lid is height-adjustable

 Concave shaped back padding provides optimal contact with the backpack

 Aluminum bars arranged to a V provide stability of the back system

 Multilayer padded hip wings are reinforced with a PE plate

V2 PLUS-SYSTEM

The size-adjustable V2 Plus Carrying System was developed for medium to high loads up to 40 kg. Backpacks with this system offer great adjustability of the back length and can be worn even with fully loaded vests and chest rigs due to the detachable hip belt.

X VENT ZERO PLUS-SYSTEM

The X Vent Zero Plus Carrying System combines excellent ventilation with perfect fit and low weight. The tension of the system can be used to regulate the distance from the backpack to the back, right up to force fit carrying.

Open space created by the supporting construction result in extremely large ventilation zone

System allows for the tension of the x-shaped fiberglass rods to be adjusted, which varies the distance of the load to the back – changing also the center of gravity of the load

Adjustable webbing straps lie on the back

X-shaped fiberglass rods are attached to the back of the pack

Hip belt is anatomically shaped and ventilated

Additional fiberglass rods transfer load to hip belt

TT RANGE PACK MK II

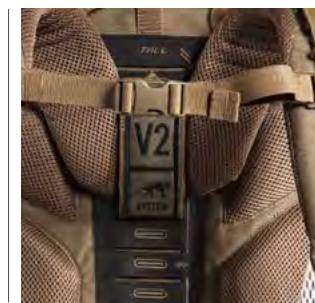

Item number: 7605
Color: 331 olive, 346 coyote brown
Size / Volume: 84 x 35 x 27 cm / 90 l + 10 l
Weight: 4,40 kg (without detachable pockets 3,50 kg)
Material: CORDURA® 700 den

Modular, large capacity backpack for individual combatants on mission for several weeks. The front pocket of the rucksack can be detached and used as a daypack, the side pockets are the same as the TT Tac Pouch 8 SP (item 7773) and can be used on any appropriately designed MOLLE panel.

[1] X1 Carrying System [2] Packsack with snow guard [3] Divided main and bottom compartments [4] Fixation for hiking poles or ice axes [5] Height-Adjustable chest belt [6] Side compression straps [7] Compression around perimeter of base [8] Detachable lid with 3 zip pockets (2 x outside, 1 x inside) [9] Two ports for drinking tubes on the lid [10] Hydration system compatible [11] Additional detachable side pockets (each 5 l, 7773 TT Tac Pouch 8 SP) [12] Front pocket unzips for use as a daypack (7 l) [13] Weight of main backpack including front- and side pockets = 4,40 kg // Weight of main backpack without front- and side pockets = 3,50 kg [14] MOLLE system on the sides

TT PATHFINDER MK II

Item number: 7622
Color: 331 olive, 346 coyote brown
Size / Volume: 84 x 35 x 22 cm / 80 l
Weight: 3,25 kg
Material: CORDURA® 700 den

Fully-fledged combat backpack for several days in the field. Large, variable volume compression flap on the front for helmets etc. The MOLLE system on the sides is used to attach additional pockets.

- [1] V2 Carrying System [2] Packsack with snow guard [3] Removable section between main and bottom compartment [4] Fixation for hiking poles or ice axes [5] Height-Adjustable chest belt [6] Side compression straps [7] Compression around perimeter of base [8] Variable volume compression flap e.g. to attach a helmet [9] Handle on front and back [10] Detachable lid, divided into 3 [11] Two ports for drinking tubes on the lid [12] Rain cover [13] Hydration system compatible [14] Side pockets [15] MOLLE system on all the important attachment areas

TT FIELD PACK MK II

Item number: 7963
Color: 331 olive, 346 coyote brown
Size / Volume: 73 x 32 x 21 cm / 75 l
Weight: 2,65 kg
Material: CORDURA® 700 den

Universal combat backpack with a total capacity of 75 liters. The TT Fieldpack MK II is designed for transport of up to approx. 40 kilograms. Main and bottom compartment can be divided for separate storage of wet or dirty clothing, etc. MOLLE on the front and on the sides serves the individual extension. The V2 Carrying System, which can be adjusted to your own back length, combines a low weight in relation to the size with outstanding flexibility and efficient load transfer.

- [1] V2 Carrying System [2] Packsack with snow guard [3] Removable section between main and bottom compartment [4] Height-Adjustable chest belt [5] Compression straps on sides [6] Handle on front and back [7] Height-Adjustable lid with zip compartment [8] Hydration system compatible [9] Port for antenna [10] MOLLE system for optional attachment of additional pouches [11] 7572 TT Tac Pouch 9 SP can be used for example as a side pocket [12] 7573 TT Tac Pouch 10 can be used for example as a lid pocket

TT MODULAR TROOPER PACK

Item number: 7263
Color: 040 black, 331 olive, 343 khaki, 346 coyote brown
Size / Volume: 62 x 34 x 19 cm / 55 l
Weight: 2,75 kg
Material: CORDURA® 700 den

Universal military backpack with two attachable pockets and the V2 Plus Carrying System. Based on the predecessor model, the TT Trooper Pack offers an optimized arrangement and new functional features. The main compartment opens completely, and the special zipper guides make it possible to use the pack as a top loader. The back panels of the front and main compartment feature MOLLE hook-and-loop for customized loading, and both front pockets have zipper mesh pouches to organize your gear. Laser-cut MOLLE on the front and sides allow you to add pouches or extra gear as you see fit. The backpack has an integrated rain cover and a removable hip belt that can also be used as a Warrior Belt. The back panel can be adjusted to different back lengths.

TT RAID PACK MK III

Item number: 7711
Color: 040 black, 331 olive, 346 coyote brown
Size / Volume: 65 x 32 x 24 cm / 52 l (48 l + 2x 2 l)
Weight: 2,90 kg
Material: CORDURA® 700 den

Classic military backpack with a total capacity of 52 liters and V2 Plus Carrying System. The TT Raid Pack MK III has a main compartment with a volume of 48 liters and two fixed side pockets with a volume of 2 liters each. MOLLE on the front, the lid, the side pockets and on the hip belt allows individual extension. The V2 Plus Carrying System of the backpack is designed for a weight of up to approx. 40 kilograms and offers great variability when adjusting the back length. Due to the removable hip belt, the backpack can also be carried with fully equipped chest rigs and vests. The hip belt can be used separately as a Warrior Belt. ▶

Item number:	7723
Color:	021 titan grey, 040 black, 331 olive, 346 coyote brown
Size / Volume:	56 x 28 x 18 cm / 25 l
Weight:	1,70 kg
Material:	CORDURA® 700 den

Deployment backpack based on the TT Modular Pack 30 for undercover deployments or civilian use. The main compartment of the backpack can be opened completely from the front or back side, and the hook-and-loop partition can be removed all together. The back and side panels of the main compartment feature MOLLE hook-and-loop patches for customizable configurations. The backpack has a large lid compartment and organizer pockets on the sides. The lid compartment features hook-and-loop panels for magazine pouches. The hip belt with zipper pockets on the hip flaps can be removed. In the bottom panel of the backpack there is a signal flap for emergency unit patches, which can be quickly fastened to the hook-and-loop front of the pack if need be. All zippers on the backpack are lockable. ▶

Weight: 1,14 kg
Material: CORDURA® 500 den IRR

Light, tactical deployment backpack for modular use. The materials used for this deployment backpack are very light, making it super easy to handle. It has a flat main compartment that is hydration system compatible and the back panel is fitted with MOLLE hook-and-loop for customizable loading of your gear. The upper front pocket of the backpack is a flip-top behind which you can attach a magazine holder (three M4 magazines or 4 pistol / MP7 magazines, included with purchase). Both middle front pockets are removable and behind each is a MOLLE hook-and-loop surface. Both the TT Tac Pouch 12 (Item 7862) or the TT 2 SGL Backup Mag Pouch M4 (Item 7811) can be attached to the lower front pocket. The backpack has a MOLLE reverse system on the back so you can integrate it into a plate carrier. You can also use an included adapter to attach it to plate carriers.

- [1] Hydration system compatible [2] Main compartment opens out completely [3] One narrow main compartment
- [4] Hook-and-loop strips for name tag [5] Capacity: main compartment 9 l, upper front pocket 2 l, ▶

middle front pockets each 1 l, lower front pocket 1 l [6] Removable bungee cord compression [7] Weight backpack without shoulder straps: 735 g [8] Interchangeable magazine inserts for 3 x M4 (PMAG) magazines (50 g), 4 x pistol / MP7 magazines (40 g) [9] MOLLE reverse system [10] Laser-cut MOLLE system [11] MOLLE hook-and-loop on the inside for limitless modularity [12] MOLLE system on the upper front pocket [13] Removable center pockets, underneath MOLLE hook&loop [14] Combinable with TT plate carrier QR LC as rear section

The items are equipped with the same features. Item 7309 is made of Cordura® 500. Item 7308 is made of Cordura® 500 den with IRR treatment.

The Modular Gunners Pack can be combined with 7811 TT 2 SGL Backup Mag Pouch M4 and 7076 TT Tac Pouch 12.

TT MODULAR 30 CAMERA PACK

Item number: 7192
Color: 040 black, 331 olive, 346 coyote brown
Size / Volume: 58 x 28 x 19 cm / 30 l
Weight: 2,40 kg
Material: CORDURA® 700 den

Modular backpack conceived as a camera and documentation pack. The focus here is on comfort and usability. The main compartment features front access and an extra top opening so you can quickly grab your camera. The interior of the backpack has adjustable partitions for cameras and lenses; the partitions can of course be removed completely. A little organizer pocket for memory cards and filters can also be removed. The backpack has a lid pocket and deep side pockets that are meant to hold a tripod and can be secured with lateral compression straps. Laser-cut MOLLE on the sides and front can be used to add gear as you see fit. The padded back panel system, which includes the padded hip belt, makes the backpack super comfortable to carry. The hip belt with laser-cut MOLLE can also be used to attach accessories, for example lens pouches, and can be removed at any time. The shoulder strap also has a camera fastener. The rain cover in the bottom pouch of the backpack completes the list of features. ▶

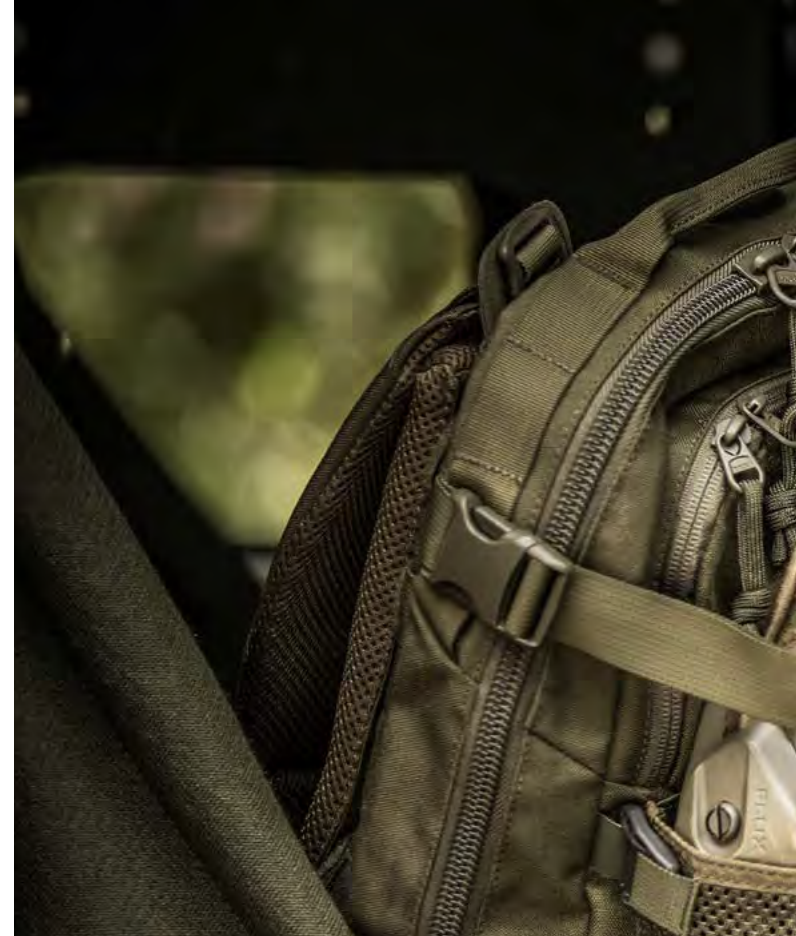

TT MODULAR 30 CAMERA PACK IRR

Flexible „soft“ load carrier for transporting heavy loads. The TT Base Carrier features a high-performance internal backpack carrying system with three-dimensionally shaped, removable hip belt. The carrier platform features a MOLLE system as well as side loops for various attachments. The TT Base Carrier can be flexibly built up with modular elements, for example with the TT Base Carrier Flap (Art 7332) or the TT Front-Side Pouch SET (Item 7391). The TT Base Carrier Pack (Item 7374) completes the load carrier to a full-fledged backpack.

[1] X1 Plus Carrying System [2] Load control straps [3] Height-Adjustable chest belt [4] Side compression straps [5] Internal reinforced frame system [6] Loop system for various fastening systems [7] Compatible with TT Base Carrier Pack (item 7374), TT Front-Side Pouch 16 Set (item 7391), TT Modular Quiver Set (item 7392)

The TT Base Carrier Pack complements the TT Base Carrier System to a full-fledged backpack and is attached to the load carrier with hooks. The pack sack pulls open completely for easy operation. In addition, for use without the load carrier, it has attachment options on the back for attaching the shoulder and waist belt of the TT Base Carrier System.

[1] Compression strap [2] Handle [3] Main compartment with lockable slider [4] Antenna ports into the main compartment [5] Pack sack for the TT Base Carrier System (item 7330) [6] Possibility to mount the shoulder straps and the waist belt of the TT Base Carrier System (item 7330) [7] Can be fixed to the TT Base Carrier (item 7330) with hooks [8] MOLLE system on all the important attachment areas [9] Laser-cut MOLLE system [10] MOLLE hook-and-loop on the inside for limitless modularity

to Video

Modular backpack conceived as a camera and documentation pack. The focus here is on comfort and usability. The main compartment features front access and an extra top opening so you can quickly grab your camera. The interior of the backpack has adjustable partitions for cameras and lenses; the partitions can of course be removed completely. A little organizer pocket for memory cards and filters can also be removed. The backpack has a lid pocket and deep side pockets that are meant to hold a tripod and can be secured with lateral compression straps. Laser-cut MOLLE on the sides and front can be used to add gear as you see fit. The padded back panel system, which includes the padded hip belt, makes the backpack super comfortable to carry. The hip belt with laser-cut MOLLE can also be used to attach accessories, for example lens pouches, and can be removed at any time. The shoulder strap also has a

TT MODULAR 30 CAMERA PACK IRR

Item number: 7054

Size: 58 x 28 x 19 cm / 30 l
Weight: 2,40 kg
Material: CORDURA® 500 den IRR

camera fastener. The rain cover in the bottom pouch of the backpack completes the list of features.

- [1] Padded Back Carrying System
- [2] Height-Adjustable chest belt
- [3] Compression strap
- [4] Handles
- [5] Lockable zipper slider
- [6] Lid with zip pocket
- [7] Integrated rain cover inside the bottom compartment
- [8] Functional interior layout for camera and accessories
- [9] Camera holder on the shoulder strap
- [10] Removable zip-up bag
- [11] Removable hip belt, can be used separately as a Warrior Belt
- [12] Laser-cut MOLLE system

The items 7192 and 7054 are equipped with the same features. Item 7054 is made of Cordura® 500 den with IRR treatment.

TT MODULAR CAMERA INSERT 30

Item number: 7180
Color: 040 black, 331 olive
Size: 28 x 26 x 12 cm
Weight: 520 g (Set)
Material: 420 HD Nylon

The insert converts the TT Modular Pack 30 into a camera backpack. It offers space for DSLR and ML cameras, including multiple lenses, and features a small organizer for memory cards and filters. The partitions are flexible. [1] Small organizer [2] Including accessories pouch: 17 x 12,5 x 1,5 cm, 80 g

NEW

TT TELE LENS BAG

Weight: 1,26 kg
Material: T-Square Rip FD

to Video

Padded inner bag with flexible dividers, suitable for the TT Modular Pack 45. The TT Multipurpose Equipment Insert has a zip-off front lid and top access, e.g. for the camera. In addition to the flexible dividers, it features transparent mesh interior compartments and an organizer. With the help of hook-and-loop strips on the outside, it can be fixed precisely to modular hook-and-loop panels. The loops on the upper edge can be used to attach the insert to all MOLLE panels or to the TT Modular Front Seat Panel with TT SR 256 Safety QA buckles.

[1] Handle [2] Main compartment with lockable slider [3] External second opening for a camera on the top side [4] Mesh interior compartments made of transparent textile material [5] Small organizer [6] Hook-and-loop adapter for mounting on modular hook-and-loop surfaces

TT MULTIPURPOSE SLING

Item number: 7105
Color: 040 black, 331 olive, 346 coyote brown
Size: 150 x 5,5 cm
Weight: 185 g (set)
Material: Nylon Webbing

Padded carrying strap with various carrying and attachment options. Quick fasteners allow you to mount either a gun hook, a webbing for sling swivels or a 3 mm cord for cameras (with 2 strings of 3 mm diameter each). The maximum load for the 3 mm cord is 85 kilograms, and it should be replaced when the inner white core becomes visible. [1] Length-adjustable [2] Padded neck / shoulder strap [3] Made from 25 mm webbing [4] Interchangeable ends: Rifle Hook, Camera Sling (3mm) or webbing for sling swivels

TT CAMERA HARNESS HOLSTER

Item number: 7239
Color: 040 black, 331 olive, 346 coyote brown
Size: 16 x 9 x 9 cm
Weight: 90 g
Material: Polyester Webbing

Practical camera holster for attachment to backpack shoulder straps, suitable for many backpack models. The adjustable holder (up to approx. 9.5 cm lens diameter) fixes the ready-to-use camera for immediate access and thus relieves the neck. The attachment to the shoulder strap via webbing and hook-and-loop closure. The neck strap of the camera must be used as an additional backup. To maintain the balance, a lens length of at least 8 cm is recommended, but this depends on the camera weight.

[1] Hook-and-loop closure [2] To be used on shoulder straps [3] To secure a loop or a D-ring on the shoulder belt is needed

TT MODULAR LENS BAG VL INSERT M

Item number: 7196
Color: 021 titan grey, 040 black, 331 olive

NIGHT CAMOUFLAGE

THE TT PRODUCT RANGE EQUIPPED WITH IRR PROTECTION

CORDURA® &
INFRA-RED
REFLECTANCE

Tasmanian Tiger manufactures tactical equipment of the highest level and addresses the security issue of camouflage, under the observation of night vision devices, with an extensive product range.

Chest rigs and plate carriers, mission and medic backpacks as well as magazine pouches, tactical pouches and daypacks are offered in the color **stone grey olive with certified IRR treatment**.

Both the European CORDURA® materials as well as webbing, hook-and-loop fasteners and buckles meet the high German Bundeswehr standards TL 8305-0278 and TL 8305-0281 with regard to the IRR camouflage effect (IRR 650 - 1250nm / 10 - 42%).

Size: 9,5 x 6 cm
Weight: 15 g
Material: T-Square Rip Light / CRYPTALLOY®

Foldout sleeve with RFID readout protection for at least four credit cards, bank cards, key cards or ID cards in credit card format.

[1] Best RFID scan protection with TÜV certified RFID blocking material CRYPTALLOY® [2] Shielding against all frequencies and can be used for all cards [3] Space for at least four cards [4] Elastic strap closure

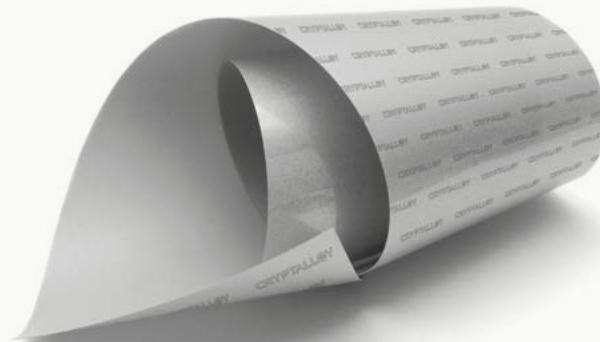

Tasmanian Tiger's RFID Block Series wallets, document cases and pouches offer 100% protection from data theft by radio-based readers or NFC smartphones with a readout app. The **Cryptalloy® film** built into the products securely shields radio waves of all commercial frequencies used in the field, making readout virtually impossible.

Possible consequences of data theft:
identity theft, loss of credit, exposure of behaviour and movement profiles, unauthorised access to business and/or private premises, etc.

TASMANIAN TIGER uses **Cryptalloy®**, a special metal alloy made by Kryptontronic Technologies of Munich, for its RFID Block products. Compared with regular metallised foils, coatings and fabrics of the same strength and flexibility that still allow a proportion of the radio frequency through, **Cryptalloy®** almost completely blocks the signal (remaining signal no longer measurable). **Cryptalloy®** has been tested by SGS/TÜV Saarland Foster GmbH, and is confirmed and certified as suitable for screening against the unauthorised reading of RFID chips (including remote chips, NFC) on commercial frequencies 125 kHz, 13.5 MHz and 900 MHz. What is significant is the protection on frequency 125 kHz. Protection against this frequency guarantees maximum protection against all the usual RFID frequencies.

CRYPTALLOY®
RFID DOCUMENT SAFE

TT WALLET RFID B

Item number: 7766

Shoulder pad to make carrying heavy loads easier. Absorbs the load transfer on the shoulder and fits on a strap up to 5 cm wide.

[1] Extra shoulder cushion for heavier loads [2] Secret pocket under hook-and-loop patch, e.g. for coins [3] NON-slip material [4] Hook-and-loop surface (loop) for patches etc.

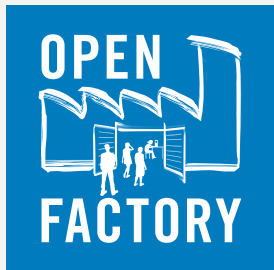

FAIR & TRANSPARENT PRODUCTION

TRANSPARENCY INSPIRES TRUST

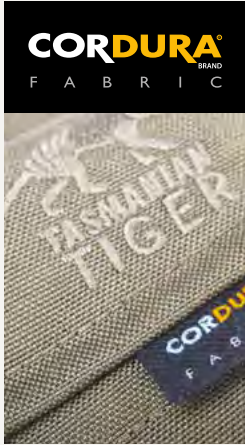

Tasmanian Tiger products are made to European manufacturing standards under high social conditions at our own factories in Vietnam. You are very welcome to visit our factory Mountech Co. Ltd. on any friday and experience how it operates.

www.openfactory.tatonka.com

MATERIAL OVERVIEW (Selection of materials)

CORDURA® 500 DEN (100% polyamide). Made from INVISTA high tenacity, air-jet textured Nylon 6.6 in 500 denier. The CORDURA® brand provides fabrics that are recognized for their long-lasting durability and resistance to abrasions, tears and scuffs; they are more durable than other fabrics. CORDURA® fabric offers a superior strength-to-weight ratio, making it a first-choice for durable fabrics.

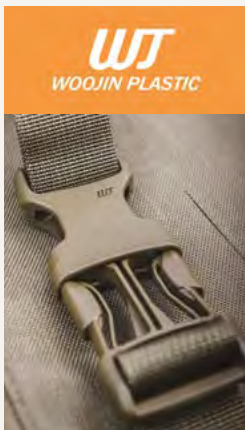

CORDURA® 700 DEN (100% polyamide). CORDURA® in fibre thickness 700 den combines the high wear and tear resistance of the classic 1000 den fabric with the lightness of the 500 den fabric.

CORDURA® WITH IRR PROTECTION Tasmanian Tiger manufactures tactical equipment in the color stone grey olive with certified IRR treatment. Both the European CORDURA® materials as well as webbing, hook-and-loop fasteners and buckles meet the high German Bundeswehr standards TL 8305-0278 and TL 8305-0281 with regard to the IRR camouflage effect (IRR 650 - 1250nm / 10 - 42%).

The Japanese company **YKK** is the global leader in zipper manufacturing and has a vast array of products in its range. Tasmanian Tiger has used YKK zippers for many years in its collection, in particular the tear-resistant YKK zippers with RC (Racquet-Coil) technology.

The YKK Fastening Products Group is trusted worldwide for impeccable production standards and thorough quality control processes.

The South Korean plastic buckle manufacturer, Woojin, operates a production site in Vietnam, which means resource-friendly transport distances between our facilities. Woojin and Tasmanian Tiger have been working together for so many years we're almost like family. The relationship includes not just development coordination but also exclusive fabrication. Tasmanian Tiger uses **WOOJIN** components throughout its entire range of products.

The side release buckles, zipper pulls, etc. made by **WOOJIN** have inspired top designers worldwide to innovate the next generation of tactical products.

T-SQUARE RIP FD (100% Polyamid) The very tight, special weave of the 210 den fibers makes this fabric extremely stable, but it remains extremely light. By using FD yarn (full-dull) the fabric gets a dull surface.

420 HD NYLON (100% polyamide). The classic 420 den Nylon material has proved itself in the „high density“ (HD) version as a good, very flexible basic material. The 420 den yarn gives it a very high tear resistance. The material is made waterproof by the triple PU coating.

TEXTREME 6.6 (100% polyester). The textured polyester material in 600 den threads is robust, colorfast and versatile. PU-coated to achieve a weatherproof finish.

CRYPTALLOY® (aluminium alloy). Screening products with the specially developed tear-resistant material CRYPTALLOY® offer the highest level of protection against RFID/NFC attacks. The TÜV certified material blocks radio waves on all the usual RFID frequencies and can be used for all cards.

110DTEX PA6.6 SILICON (100% polyamide). Lightweight, double-sided silicone-coated and printed Nylon fabric in 5-color camouflage. The material according to TL 8305-0278 is used for rain covers.

T-COVER TEX (100% polyester). This very light, waterproof material made out of polyester is pleasantly soft to the touch, and is used mainly for rain ponchos, rain covers and stuff bags.

T-SOFTSHELL 3L (Outer layer: 100% Polyamide, inner layer: 100% polyester, membrane: 100% polyurethane). This technical 3-layered Softshell material has a polyamide outer and a soft micro-fleece inner side, is wind- and water repellent as well as breathable.

T-Vent 3L (Outer layer: 92% polyamide, 8% elastane, inner layer: 100% polyamide, membrane: 100% polyurethane). This robust, elastic, wind- and waterproof 3-layered material is used for high-quality hardshell jackets. This ultrathin non-porous membrane is extremely waterproof and offers a high air permeability and stretchability.
