

# JAKELE J1

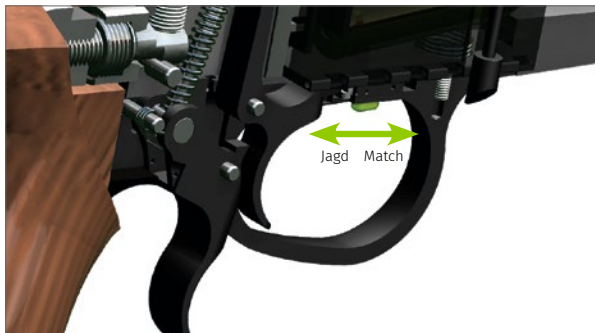

The new bolt action rifle

Safety

thought through to the end

## Details and special features

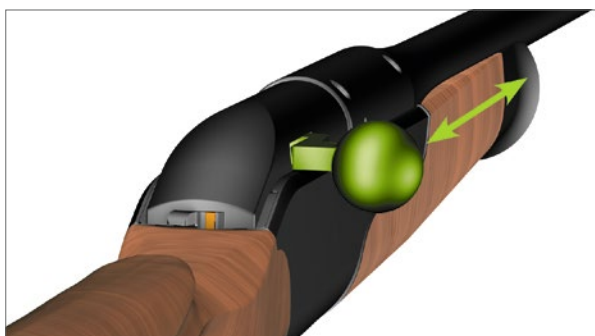

### Adjustable trigger

The trigger itself is always important for an accurate shot. The fine trigger of the J1 impresses with its top characteristics: it has no creep. The trigger pull can be switched between approx. 250 g / 550 g and approx. 450 g / 950 g respectively. The J1 fine trigger is convincing in every situation with minimal trigger travel (trigger stop) and is nevertheless completely safe before and after every shot due to the decocked cocking lever.

### Bavarian Precision Mount

With the Bavarian Precision Mount (BPM), one-handed operation is easily possible when mounting and dismounting the scope (the holding hand on the rifle, the other hand remains on the scope) with no more conflicts with elevation turrets of the scopes. The mount locks via a control cam and features extreme strength (also suitable for heavy optical devices) without harming the elegant overall appearance of the J1.

### Straight pull action

The shapely bolt handle with ball enables fast repeating in straight pull without significantly restricting the view of the action. The view of possible engravings is preserved, the overall picture remains coherent.

### Highest quality, Bavarian Precision

Quality in detail determines the longevity and value retention of products from Jakele. Many ideas, many years of knowledge and experience and the very highest standards flow together in the development and are implemented with partners who meet the same standards in their field. All essential components are manufactured in Bavaria – this guarantees solid production, a consistently reliable weapon. You can trust that. Trust in Jakele quality.

# JAKELE J1

## Revolutionary cocking lever – Jakele Relax system

In the Jakele Relax system, safety is thought through to the end. The J1 is only cocked by the innovative cocking lever immediately before firing. The middle finger pulls back in an intuitive movement with minimal effort. When the hand loosens – for example after firing or for position correction – the cocking lever slides back to its original position.

This automatically decocks the rifle and makes it completely safe.

## Compact and light

The design is compact but slim. An elegant appearance that convinces with modern ergonomics.

The perfect aesthetics are not only pleasing to the eye, but also make the J1 a lightweight, enormously maneuverable weapon weighing just 2.6 / 2.7 kilograms respectively. And a round-body action – a real pleasure to hold.

## Quick change of the stock

Change the stock in minutes. Depending on the hunting situation, change from wood to synthetic or vice versa in a few simple steps. The patented stock mounting screw is loosened or tightened with the help of the J1 key integrated in the fore-end. The tension-free fore-end mount, maximum temperature tolerance and three-dimensional locks also ensure that the point of impact remains stable when the stock is changed.

## Self-centering four-lug locking mechanism

The high-precision, self-centering bolt head with four locking lugs rotates 90° into the barrel and provides an enormously high locking surface for maximum safety and accuracy.

# Jakele J1

Revolutionary safe, extremely compact, elegant, in highest quality

revolutionary safety

## Revolutionary safe

Jakele Relax-System® with unique cocking. Thanks to a revolutionary cocking lever on the trigger guard, the gun is not cocked until it is consciously cocked immediately before firing by pulling the cocking lever to the pistol grip. When the hand is removed from the gun, the cocking lever slides back to its original position. The gun is thus decocked and absolutely safe.

## J1 Alpin

- wooden thumbhole-stock
- 4 different wood grades available, starting from Premium category class as standard (HK 5/6)
- stock set for right handed / left handed optional (without extra charge)
- rubber pad 17 mm
- prepared for Jakele pistol grip caps
- exchangeable stock set in synthetic version optional

## J1 Alpin Bavaria

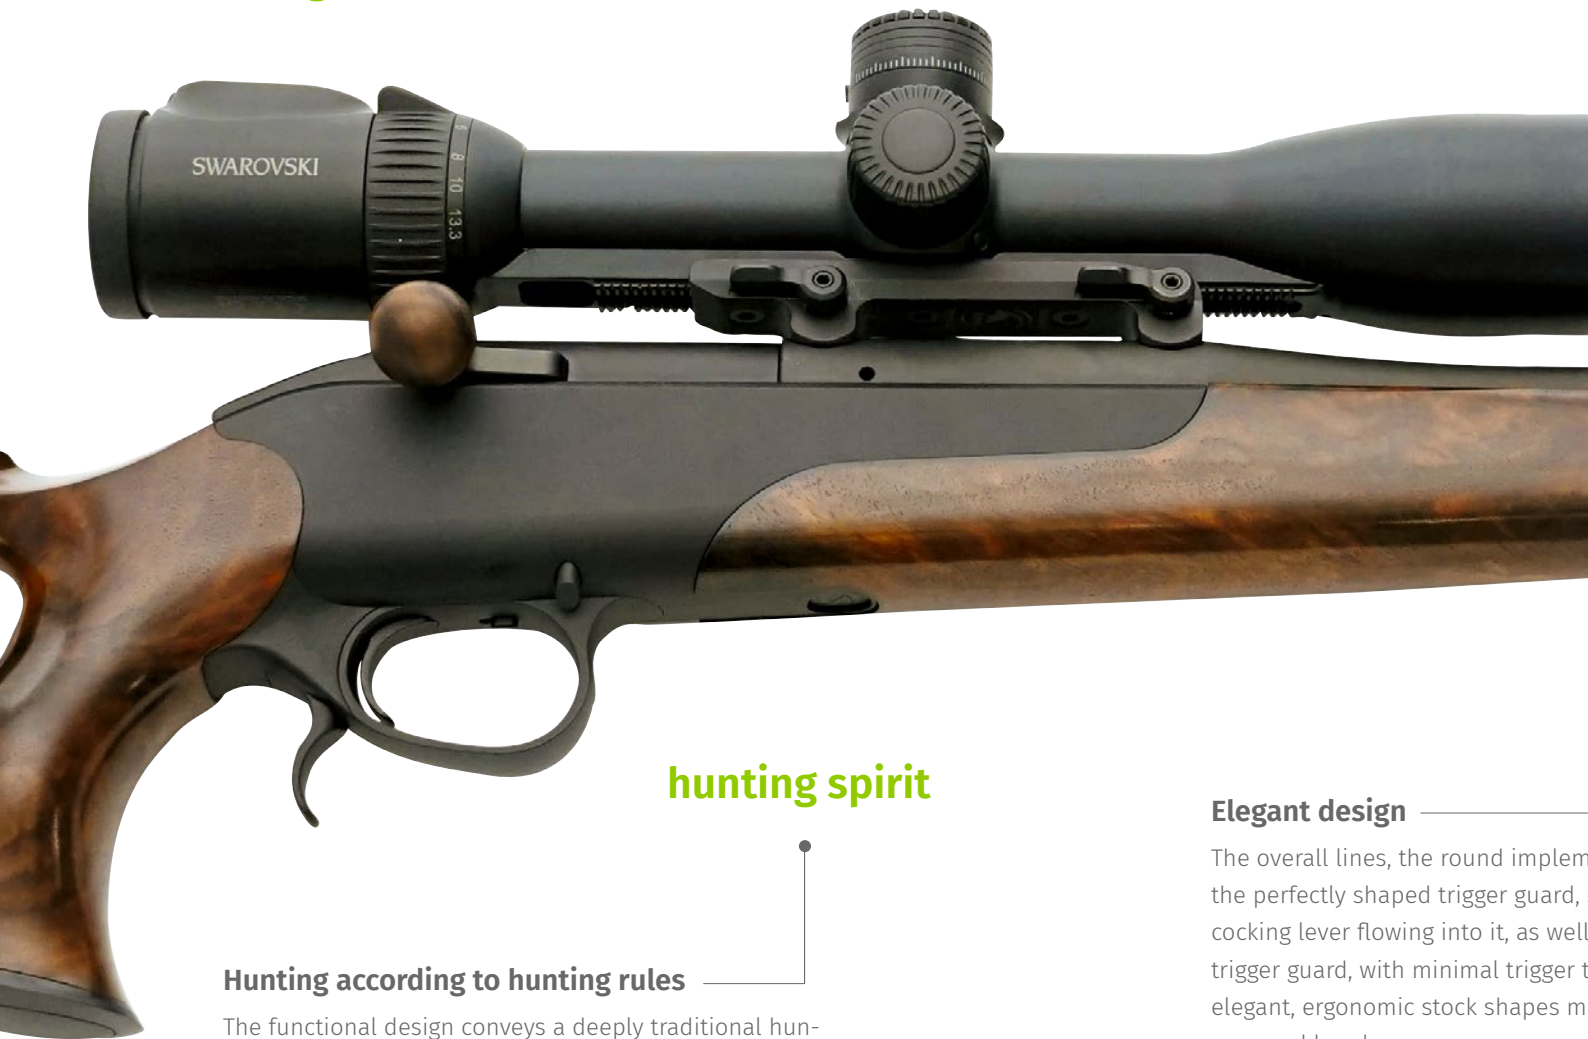

- wooden stock in traditional design with Bavarian cheek piece
- 4 different wood grades available, starting from Premium category class as standard (HK 5/6)
- stock set for right handed / left handed optional (without extra charge)
- rubber pad 17 mm
- prepared for Jakele pistol grip caps
- exchangeable stock set in synthetic version optional

## handling

### Intuitive handling

The ergonomic design, short dimension, slim straight pull during the repeating process, low profile and light weight allow intuitive handling and smooth movement from shooting to firing.

## hunting spirit

### Hunting according to hunting rules

The functional design conveys a deeply traditional hunting attitude. The focus is on respect for creation. Both with regard to the human and his safety, as well as to the game and hunting.

### Elegant design

The overall lines, the round implementation of the perfectly shaped trigger guard, the cocking lever flowing into it, as well as the trigger guard, with minimal trigger travel, elegant, ergonomic stock shapes meet the eyes and hands.

### J1 All-Terrain

- synthetic thumbhole-stock
- stock color: brown
- stock set for right handed / left handed optional (without extra charge)
- rubber pad 17 mm
- prepared for Jakele pistol grip caps
- exchangeable stock set in synthetic version optional

**highest quality**

### Highest product quality

To meet the high quality standards, we use only the best materials and surfaces, from the barrel to the smallest screw. The self-centering four-lug locking mechanism with very large locking surfaces is the heart and guarantor for outstanding accuracy and robustness. Absolutely silent cocking and decocking of the rifle is a matter of course for us. All essential components are manufactured in Bavaria – Bavarian Precision!

**elegant**

**modular**

### Modular structure

Thanks to the innovative, patented stock attachment, any change of the stock is possible in just a few steps. Interchangeable systems such as barrel and bolt can be used depending on the desired caliber. The entire rifle can be easily disassembled into a few modular components using the J1 key integrated in the forearm.

# Jakele J1 – the revolution in weapons technique

Absolute safety. Intuitive Handling and design to perfection.

## The dream of a hunting rifle – now a reality from Jakele.

Safety off, shoot, safety on – the eternal triad.

This command is always with you, occupies the back of the head, demands constant review. Demanded. That is past. Because the Jakele J1 is always decocked. It is only cocked immediately before firing. A new, patented cocking lever directly on the trigger guard is only moved during conscious aiming. It slides automatically back, once the hand or fingers are removed from the pistol grip, thereby decocking the rifle. The J1 concentrates excitement exclusively when it is needed: for firing.

The perfect hunting experience does not consist of one shot. It is formed from many dreamlike moments:

The smell of morning mist, the sound of silence, the feeling that breath and heartbeat become one when a species game is shot. It is the reverence that is conveyed to the hunted species by the last bite according to ancient custom and that is experienced in the hands of the 'Schützenbruch'.

These are moments of solitude close to nature and times of great gratitude to creation.

And yet a single moment of inattention, a second of carelessness can turn the dream into a nightmare.

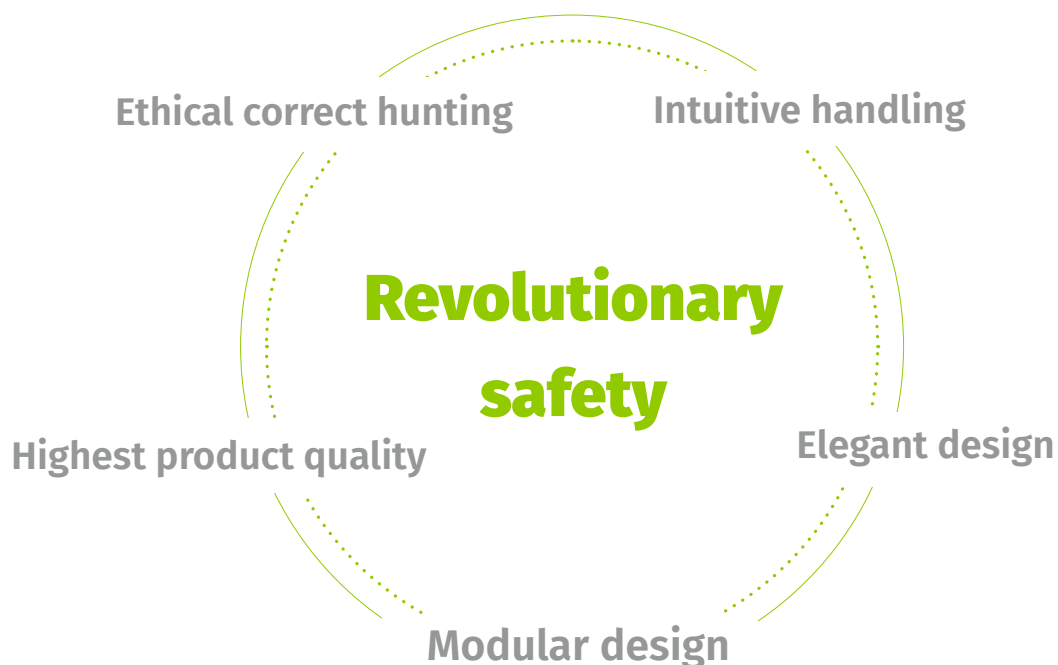

All it takes is one shot that goes off unintentionally.

A shot that misses, that kills, that injures. Or just the leaden shock of forgetting to decock or secure the safety catch.

It is enough to know that an accident could have happened to ruin the day and, in the worst case, the life. At best, a fear remains, an uncertainty that overshadows many hunting moments afterwards.

With the Jakele J1, securing or consciously decocking of the hunting weapon is not necessary. Gone. Past. Instead of uncertainty, which is dangerous and stressful, the J1 always offers a decocked and therefore relaxed basic state due to the new cocking lever.

The Jakele Relax System is nothing less than revolutionized safety. For a clear head, for safe and relaxed hunting.
